

# FJORD

Rudder

This kayak is ideal for the Intermediate paddler or a beginner looking to improve their paddling technique. Its rudder allows the user to progress technically while benefiting from the advantages of a rudder. When leaning, the reverse hard chine and semi-arched hull offer excellent secondary stability and outstanding manoeuvrability.

A composite model (fibreglass, Kevlar® or carbon) is available for paddlers seeking a combination of low weight and performance.

Fjord is a Norwegian word and refers to a steep-walled, generally deep inlet between high rocky cliffs that was gouged out by the passage of a glacier and flooded by the sea.

<b>Material:</b> Composite	<b>Length</b> 16' 4" (4.98 m)	<b>Beam</b> 22 1/2" (57.2 cm)	<b>Depth</b> 13 7/8" (35.2 cm)	<b>Volume</b> 108 gal us (400 l)
